

1. Prior to installing Microsoft SQL, please confirm that the following are selected so that the proper Collation will be used for Microsoft SQL.: SQL_Latin1_General_CP1_CI_AS.
2. This can be done by going to Control Panel – Region and Language and modifying the “Formats” tab, “Location” tab, and “Locale” tabs to English (United States).

3. During the installation of Microsoft SQL, there will be a screen showing the collation of SQL_Latin1_General_CP1_CI_AS, which can also be confirmed after installing by going to SQL Server Management Studio and once logged in right click on the Server and go to properties. You should see the following:

Server Collation	SQL_Latin1_General_CP1_CI_AS
------------------	------------------------------

4. Once SQL has been installed and configured, you are welcome to go back into the Region and Language and select the appropriate Format and Location.
