Introduction

This update to the Windows version of the RFMS Business Management System includes many new features and enhancements. The update also includes many “behind the scenes” changes that increase processing speed and other performance-related functions. This document explains only the new features contained in this update.

For all alterations, see the release notes on the download web page or [Release Notes – RFMS Help Desk \(zendesk.com\)](#)

RFMS Core

RFMS Core Program Suite For Sql

To see what you may have missed in previous updates, click [here](#).

[For directions on loading updates to the RFMS software, click here.](#)

The same documentation is included in the online help system and can be accessed by pressing the F1 button at any RFMS screen. If something is on the screen you either do not recognize or understand, check this document, refer to the Help Files by pressing F1 or go to <https://rfmsinc.zendesk.com>

Next

Version 24.1 is required for using the RFMS Next Online Software version 1.4.

Human Resources

The 2024 version of the 941 form is included in this update.

Products

Roll and item color level browse now have column labeled Display on Website.

This option is editable via a drop-down box under the Color Change dialog. Options include: Do Not Display, Display without Stock, and Display with Stock.
